

Airbnb Listings REST API Documentation for Local

Base URL:

https://127.0.0.1:8000

*If you want to check API with other laptop, try "192.168.53.202:8000"

*If it does not work, find local IP address using this command on terminal:

hostname -I	Linux
ipconfig getifaddr eno	Macbook

Endpoints

1. GET /

Test the connection to check if the API is running.

- **Response:**

```
{  
  "message": "Airbnb Flask API is running!"  
}
```

2. GET /listings

Returns a list of listings.

- **Optional query param:** **limit** (default: 50)
- **Response Fields:** **_id**, **name**, **price**, **address.country**, **description**, **review_scores.review_scores_rating**
- **Example:**

GET /listings?limit=5

3. GET /listings/search

Search listings by country and minimum price.

- **Query Parameters:**

- `country` (e.g. Portugal)
- `min_price` (e.g. 60)

- **Example:**

GET /listings/search?country=Portugal&min_price=60

4. GET /listings/<listing_id>

Returns detailed information about a specific listing.

- **Example:**

GET /listings/1003530

5. GET /listings/<listing_id>/reviews

Returns all reviews for the specified listing.

- **Example:**

GET /listings/1003530/reviews

6. POST /reviews

Add a new review (mock insert).

- **Method:** POST

- **Headers:**

- `Content-Type: application/json`

- **Request Body (raw + JSON):**

```
{
  "listing_id": "1003530",
  "reviewer_name": "John Doe",
  "reviewer_id": "user123",
  "comments": "I had a great experience;)"
}
```

- **Success Response(201 CREATED):**

```
{
  "message": "Review added successfully",
  "review": {
    "_id": "683399822954d02214f4af1c",
    "comments": "I had a great experience;)",
    "date": "2025-05-25T22:28:18.924751",
    "listing_id": "1003530",
    "reviewer_id": "user123",
    "reviewer_name": "John Doe"
  }
}
```

- **Error Response (400 Bad Request; Missing Fields):**

```
{
  "error": "listing_id and comments are required"
}
```

7. DELETE /listings/<listing_id>/reviews/<_id>

Delete a specific review from a listing.

- **Method:** DELETE

- **Example:**

192.168.53.202:8000/listings/1003530/reviews/68339a9e2954d02214f4af1e

- **Success Response:**

```
{  
  "message": "Review deleted successfully"  
}
```

- **Error Response:**

```
{  
  "error": "Review not found or already deleted"  
}
```
